

## TRAILER

### GENERAL

The RME Trailer is built on a 2700kg boogie trailer. Equipped with a low built 500L preheater and a power pack to supply with diesel, electricity and hydraulic power, the unit can supply a hand application team with the tools and material needed. The low height allows access for working indoors and in parking garages etc. The trailer can be equipped with racks for holding RME Handtools and LP-gas tubes according to buyer's choice.
